Profile

A software developer with a Bachelor's of Science in Computer Science from Washington State University. I am passionate about solving problems and the journey along the way.

Experience

Software Engineering Intern at Limeade; Bellevue, WA – Summer 2019

- Member of cloud team and worked on containerization, cloud deployment, and product development in a C# / .NET codebase
- Assisted in migration of product to a cloud-based infrastructure, reducing server costs and improving ability to quickly test and deploy future features.
- Worked with multiple cloud and scaling technologies such as Docker, Amazon Web Services, and Azure Service Fabric

Intern at AMC Engineers; Anchorage, AK – Summer of 2016, 2017

- Performed drafting work in AutoCAD and Revit
- Functioned as information technologies services and upgraded an office of 20 employees to Windows 10 as well as solved common issues in office setting

Customer Service/Service Agent, Midnight Sun Car and Van Rental; Anchorage, AK – Summers of 2015-2018

- Worked in front facing customer service roles doing bookings, check-in/checkouts
- Served as a shuttle driver, loading luggage and driving customers
- Cleaned and maintained cars for rent

Education

Washington State University; Pullman, WA; B.S. Computer Science, December 2019; GPA 3.54

Programming Languages and Skills

C#, Python, C/C++, Java, JavaScript, HTML/CSS, Shell Scripting, Object-Oriented Programming, Data Structures, Systems Programming, Docker, Azure

Projects

SMS Notifier

Created and supported an application using WinForms and Twilio to allow users to deliver SMS notification messages from a do not reply number to assist a number of local businesses in communication needs. In progress of porting this to a web application for ease of updating, additional features, and adding additional customers
